##### **Date Problems**

There was information keyed in for Feb. 29, 1900 when 1900 wasn't a leap year. Feb. 29, 1900 was removed from the following data sets:

C4060A, C4528A, C7185A, C7196A, C7251A, C8053A, C8266A, C8933A,  
C14278A, C14355A, C14419A, C16161A, C17350A, C18151A, C19443A, C21896A,  
C22448A, C23196A, C25681A, C26463A, C26490A, C26761A, C26842A, C27012A,  
C27965A, C29890A, C34020A, C34648A, C36003A, C36077A, C44312A, C44651A

There was a 99 line keyed for the indicated months within the following data sets. It was found that no data was available to be keyed for these months. No changes were made to the data sets.

C034 (12/1928), C8930 (8/1940), C22395A (3/1926), C22440A (4/1907),  
C28293A (9/1937)

Additional date problems resulting in changes to the keyed data:

Keying Problem

C8481 Data Set

Station I.D. was keyed as 010170 and should have been keyed as 010163. Data was changed to correct I.D. and city name.

010163 Alexander City 6NE, AL June 1948

Keying Problem

C8482A

June 1948 shouldn't have been keyed. The data were removed from C8482A.

010272 Anniston, AL 1941-1944

Microfiche Problem

C8488-C8491 Data Sets

Two sets of fiche exist for this station during this time period. Data is identical on both sets of fiche. **C8491 was deleted from the Master Fiche List.**

010369 Ashland, AL Mar-May 1941

Keying Problem

C8494

A trace of snowfall was keyed when there was no snowfall. The erroneous snowfall data was removed.

010377 Ashville, AL Jan-Mar 1918

Microfiche Problem

C8499

It was found that these months were unreliable, so they were removed from the data.

010377 Ashville, AL Jan-June, August 1920

Microfiche Problem

C8500

It was found that these months were unreliable, so they were removed from the data.

June 1948 shouldn't have been keyed. The data were removed from C8482A.

010854 Bishop, AL 1945-47

Keying Problem

C8537 Data Set

Station I.D. was keyed as 010790 and should have been keyed as 010854. Data was changed to correct I.D. and city name.

011324 Camp Hill, AL Nov. 1902

Keying Problem

C8570

The wind data was keyed in the snowfall field. The wind data was moved to the appropriate column.

011324 Camp Hill 2 NW, AL Dec. 1906

Keying Problem

C8571

Max. Temps were found to be unreliable in Dec. 1906. The data was corrected.

011807 Coffee Springs, AL 1923-27

Microfiche Problem

C8610

The temperature data was keyed in the columns for max and min temperatures. It was discovered that the observations occurred at 6 a.m. and 1 p.m. Central Time. The data was moved from the Max/Min column to the 7 a.m. and 2 p.m. columns. Thus the time of observations is one hour off.

011940 Cordova, AL Feb 1901

Microfiche Problem

C8616

It was found that the temperature data for this month was unreliable, so it was removed from the data and replaced with 9999.

011940 Cordova, AL Nov. 1942-1944

Microfiche Problem

C8622-8623 Data Sets

Two sets of fiche exist for this station. One is a regular station record, the other is a River station record. Temperature values were not recorded on C8623 but the precip values were the same on both fiche. **C8623 was deleted from the Master Fiche List.**

011520 Centreville, AL 1940-1944

Keying Problem

C8593 Data Set

Station ID was keyed in as 011492 when it should have been 011520. The station name should have been Centreville instead of Center Grove. Both changes were made to the data set.

011694 Clanton, AL Nov. 1904

Keying Problem

C050

The temperature range for Nov. 1904 was keyed in the field for snowfall. The data was corrected.

012188 Dayton, AL Nov. 1940-1944

Microfiche Problem

C8636, 8638 Data Sets

Two sets of fiche exist for this station. Recorded values were keyed twice and were verified to be the same in both files.

**C8638 was deleted from the Master Fiche List.**

012207 Decatur, AL 1890-1894

Microfiche Problem

C8640

Fiche had December 1894 listed ahead of 1890. Moved 1894 to the end of the data set to keep it in chronological order.

012207 Decatur, AL Nov-Dec 1919, June 1924

Observer Problem

012971 Florence, AL and

012976 Florence at Lock, AL 1890-1940

Microfiche Problem

C8708A - C8733A Data Sets

Data for Florence at Lock, AL was contained on microfiche for

Florence, AL for the corresponding years from 1890-1925. The data for Florence at Lock from 1890-May 1910 and April 1913-June 1914 contains different precipitation data than Florence. June 1910-April 1913 and July 1914-1925 contains identical precipitation data for both Florence and Florence at Lock. **This data is deleted.** Station History Records do not show anything for Florence at Lock before 1936. Since there are different readings for precipitation before then, we have assigned the station ID for Florence at Lock for this data. From 1925-1940, data on the Florence at Lock, AL microfiche was actually the data for Florence AL. The keyed data for each station was a combination of data from both stations. Corrections were made on each data set to correct the problem. The following Data sets were changed as follows:

023010 Flagstaff WB AP, AZ

023011 Flagstaff (A), AZ

023012 Flagstaff (B), AZ

Station ID Problem

C9219-C9228 Data Sets

The Microfiche have different ways of listing Flagstaff... (i.e. Flagstaff A, Flagstaff B, Flagstaff 1, Flagstaff 2, etc.) With confirmation using the actual substation records, it was determined that there are several distinct stations. Flagstaff (A) 023011 was open from July 1907 through August 1911. The fiche only had it labeled through 1910, so corrections were made to C9219 to have it all be Flagstaff (A). Flagstaff (B) 023012 ran from April 1905 through January 1907 and the station ID was correct for this data set. Flagstaff WB AP ran from 1893 through the present, with gaps in the time periods covered by Flagstaff (A) & (B). The ID for this station is 023010. This information was correct in the data up until June 1943, when the station was moved to the Airport 4 miles south. A new station 023007 was opened up in the city of Flagstaff and run from June 1943 until 1951. The data contained on the fiche was for this new station. The data was changed on C9227 to reflect this new information.

The station ID was keyed as 041005 and it should have been 041009. The data was corrected. Also, Master Fiche List was corrected to reflect the correct Station ID.

041018 Bowman Dam, CA 1901-04  
Keying Problem  
C10280A  
Due to a file in the data set already being named C10280A, the file named C10280A (w52492) was renamed C10280B.

041018 Bowman Dam, CA Jan. 1901-May 1901  
Keying Problem  
C10280B  
Due to duplicate data being discovered for Jan. 1901-May 1901,

Jan. 1901-May 1901 in C10280B was removed.

041017 Bowman Dam, CA 1916

Keying Problem

C10283A

The station ID was keyed in as 041018 when it should have been 041017. The station ID was corrected on the data set. 1915 was moved to C10282A to keep the data for the station separate.

041018 Bowman Dam, CA 1910-1912

Keying Problem

C10282A

The station ID was keyed in as 041017 when it should have been 041018. The station ID was corrected on the data set.

041018 Bowman Dam, CA Feb 1921

Observer Problem

C10284A

Unknown data was written in the precip and snowfall columns for Feb 21<sup>st</sup>. The data was removed.

041018 Bowman Dam, CA Feb 1931, Apr 1938

Keying Problem

C10285A-86A

Snowdepth and snowfall amounts for several days were keyed incorrectly. The data was corrected.

041072 Bridgeport, CA

041075 Bridgeport Dam, CA 1903-1947

Microfiche Problem

C10293A-C10306A

From 1903-1939, there was duplicate data for both Bridgeport and Bridgeport Dam. **C10296A-C10301A were deleted from the Master Fiche List** because of this duplication. C10293A-C10294A are for Bridgeport, while C10302A-C10306A are for Bridgeport Dam. The station ID was changed for C10293A from 041075 to 041072. C10305A-C10306A had the wrong station ID and was changed from 041072 to 041075.

041075 Bridgeport Dam, CA May 1938

Keying Problem

C10304A

The Max temperature was keyed incorrectly. It was not right justified and was missing the first digit of the temperature. The data was corrected.

041112 Brooks Farnum Ranch 1945-1947

Keying Problem

C10315A

The station ID was keyed as 041109 when it should have been 041112. The data set was corrected. **Also, Master Fiche List was corrected to reflect the correct Station ID.**

041161 Buck's Lake, CA 1916-19

Keying Problem

C10323A

Several months had the snowfall keyed in as whole numbers when

they should have been keyed as tenths. The data was corrected.

041268 Cajon Ranger Station, CA 1925-1930

045218 Lytle Creek Ranger Station, CA

Microfiche Problem

C11249A-50A

It was determined through looking at the fiche and station history files that 1925 through March 1930 was actually Cajon Ranger Station 041268 not Lytle Creek Ranger Station 045218. January through March 1930 was moved from C11250A to C11249A and the station ID for 1925 through March 1930 was changed from 045218 to 041268. Also, 99's were keyed in for multiple months in C11250A. The 99's were removed from the dataset.

041277 Calveras Big Trees, CA 1930-34

Microfiche Problem

C10341A

Several months had the snowfall categorized as the snowfall depth. The data was moved from the snowdepth column to the snowfall column. Also the precipitation was split between liquid precip and liquid precip from snow. The data was totaled and moved to the precip column.

041312 Calistoga, CA 1906-Oct 1916

Observer Problem

C10364A-66A

The temperature data for this time period was observed at 7 am, 2 pm, and 9 pm. It was not always written on the fiche that these were the observation times, so many months were keyed as Max/Min/Range. The data was corrected.

041444 Camp San Luis Obispo 1942

Keying Problem

C10382A

December 1942 had the wrong station ID keyed. It was keyed as 041373 and should have been 041444. The data was corrected.

041462 Camptonville, CA 1910-1919

Keying Problem

C10383A-84A

Several months had the snowfall keyed in as whole numbers when they should have been keyed as tenths. The data was corrected.

041462 Camptonville, CA Feb 1933

Keying Problem

C10387A

The snowdepth was keyed in incorrectly for several days. The data was corrected.

041497 Canyon Dam, CA Dec 1926

Keying Problem

C10394A

Data for snowdepth was keyed incorrectly. The data was corrected.

041614 Cedarville, CA 1910-1921

041630 Central Camp, CA 1927  
Keying Problem  
C10412A  
Snowfall data was keyed in for the wrong days in Feb 1927. Also,  
snowdepth was miskeyed for several days in this data set. The  
data was corrected.

041630 Central Camp, CA 1929  
Keying Problem  
C10412A  
A blank line was keyed causing a break in the data set. This  
line was deleted.

041739 Chittenden Pass, CA March 1909  
Observer Problem  
C10437A  
The Observer mistakenly put the max temp in the min temp column  
and vice versa. The data was corrected.

041739 Chittenden Dam, CA 1945-1947  
Keying Problem  
C10439A  
There was a blank line keyed causing a break in the database.  
The line was removed.

041779 Claremont/Pomona College, CA 1945-49  
Keying Problem  
C10451A  
Due to a file in the data set already being named C10451A, the

041779 Claremont/Pomona College, CA 1945-47  
Keying Problem  
C10451B  
Due to duplicate data being discovered for 1945-47, 1945-47 in  
C10451B was removed.

041837 Cloverdale, CA 1910-1914  
Keying Problem  
C10473A  
The Station ID was keyed as 041845 when it should have been  
041837. The data set was corrected.

041837 Cloverdale, CA 1934-1935

Keying Problem

C10477A-C10478A

Dec. 1934 was keyed in as Dec. 1935. The C10477A was corrected for this. It was also discovered that the Master Fiche List had C10477A with data from Jan. 1930-Dec. 1935. However, investigating C10477A and C10478A proved that the data sets were correct and the Master Fiche List had C10477A listed incorrectly. **The Master Fiche List was changed** to reflect data for C10477A from Jan. 1930-Dec. 1934.

041837 Cloverdale, CA May 1948

Keying Problem

C10480A

'99's were keyed for May 1948. May 1948 was removed due to incomplete data.

041840 Cloverdale 11W, CA Nov. 1939-1940

Keying Problem

C10481A

The station ID was keyed as 041837 with the station name "Cloverdale" when it should have been 041840 and Cloverdale 11W. The station ID was corrected on the data set.

041840 Cloverdale 11W, CA Nov. June 1940

Keying Problem

C10481A

The station ID was keyed as 041844 with the station name "Clover Meadow GS" when it should have been 041840 and Cloverdale 11W. The station ID was corrected on the data set.

041912 Colfax, CA Jan 1905, Nov 24<sup>th</sup>-30<sup>th</sup> 1910

Observer Problem

C1452-53

The Observer mistakenly put the max temp in the min temp column and vice versa. The data was corrected.

041912 Colfax, CA Feb. 1923

Keying Problem

C1455

Feb. 1923 was keyed as Feb. 1922. The data set was corrected.

041945 Colusa Bridge, CA April 1916

Microfiche Problem

C10497A

It was found that the minimum temperatures for this month were unreliable. The min temps were the same for the whole month. The data was corrected.

041945 Colusa Bridge, CA 1920-1924

Keying Problem

C10498A

The station ID was keyed in as 041948 when it should have been 041945. The station ID was changed in the data set.

042081 Covello, CA 1894-1949

Chronological Problem

C10514A-C10516A

After investigating Covello with Cliserve Station History and Station Details, it was determined that Jan. 1894-Feb. 1894 was indeed Covello. Therefore, the following was changed:

Old Data Set Name	New Data Set Name
C10514A	C10515A
C10515A	C10516A
C10516A	C10514A

042088 Covina, CA 1906-1918

Keying Problem

C10522A-24A

March 1906: Precipitation values were keyed in for the Maximum Temp. The data was corrected.

1906-1918: The 7am, 2pm and 9pm Temperatures were keyed in the wrong column. Also, there were multiple months with monthly rainfall totals keyed in either as a one day rain event or a continuous total of the year's precip. The data was corrected.

042088 Covina, CA 1906

Keying Problem

C10522A

April 1906 data wasn't labeled as such. Only the day (numerical) was listed for each. The data set was labeled April 1906.

042088 Covina, CA Jan. 1922

Keying Problem

C10525A

The station ID was keyed as 042090 when it should have been 042088. The data set was corrected.

042173 Crockett Station, CA Aug.-Dec. 1947

Keying Problem

C10549A

The station ID was keyed as 042177 when it should have been 042173. The data set was corrected.

042239 Cuyamaca, CA Jan. 1916

Keying Problem

C032

Snowfall totals were keyed in on days that didn't have snowfall. The data was corrected.

042334 Deer Creek Power House, CA April 1915

Observer Problem

C10573A

Snowdepth was written in the Snowfall column. The data was corrected.

042346 Delano, CA 1906-1916, March 1907

Observer Problem

C10588A-90A

The 7am, 2pm and 9pm Temperatures were keyed in the wrong column.

The data was corrected. It was also found that March 1907 was unreliable and the data was removed.

042346 Delano, CA 1909-16

Keying Problem

C10588A-90A

96's were keyed in for several months in this time period. The 96's were removed from these months to allow for the data to be accessed. The reason for the 96's is no precipitation keyed in for these months. Some of the total precip. amounts for the months were either not keyed in, or were an accumulation of rainfall from the rainy season. The precipitation amounts were corrected when possible.

042380 Delta 1, CA Jan. 1908

Keying Problem

C12206A

96 was keyed in for the month of Jan. 1908. The data was found to be reliable, so the 96's were removed so the data could be accessed.

042389 Denair 3 NNE, CA Feb. 1914

Observer Problem

C10595A

Max and Min. Temps. were keyed in the wrong column. The data was corrected.

042389 Denair 3NNE, CA Jan. 1924

Chronological Problem

C10597A

Jan. 1924 was keyed out of chronological order in the data set. The data set was corrected to reflect proper chronological order.

042458 Dobbins, CA Mar-Apr 1907

Microfiche Problem

C10609A

The temperature data for these months were found to be unreliable. The temps were removed from the data.

042490 Dos Rios, CA 1946

Keying Problem

C10620A

An extra line was keyed after October 1946. The extra line was deleted.

042494 Downey Fire Dept., CA 1907-1916

Observer Problem

C10621A-23A

For several months during this time period, the observer failed to note that the observations were 7am, 2pm, 9pm instead of traditional Max/Min. The data was moved to the proper column.

042494 Downey Fire Dept., CA 1909-17

Keying Problem

C10621A-23A

96 was keyed in for several months between 1909-1917. The data was found to be reliable, so the 96's were removed so the data

could be accessed. The reason for the 96's is zero precipitation months. Also, several of the precipitation totals were keyed in from the total of the rainy season, not for the month. These totals were corrected.

042500 Downieville, CA 1938-1939

Keying Problem

C10629A

The station ID was 042494 when it should have been 042500. The data set was corrected.

042500 Downieville, CA 1940

Keying Problem

C10630A

An extra line was keyed after October 1940. The extra line was deleted.

042598 Eagle Mountain, CA Aug 1940

Observer Problem

C10663A

The observer had written in zeros for the days with missing min temps. The zero's were replaced with 9999.

042643 East Pine Flats, CA 1933-43

Observer Problem

C10673A-75A

The observation times for this station were 8am and 5pm for the temperatures. They were not Max/Min temps. The temps were moved to the 7am and 2pm columns so they would not be confused with Max/Min.

042728 Electra, CA 1915-1948

Keying Problem

C3496-C3502

**C3496-C3502 was deleted from the Master Fiche List** due to duplication of the data on C10693A-C10699A.

042756 Ellery Lake, CA 1925-36

Keying Problem

C10702A-04A

There were several miskeys involving snowfall, precip, and snowdepth. Snowfall was often keyed in inches instead of tenths. The data was corrected.

042760 Elliott, CA Jan. 1941

Keying Problem

C10710A

Jan. 1941 was keyed as Jan. 1940. The data set was corrected.

042805 Elsinore, CA July 1929

Observer Problem

C10717A

The observer had written in zeros for the days with missing min temps. The zero's were replaced with 9999.

042862 Escondido, CA 1900

Keying Problem

C10722A

Dec. 1900 was not keyed in. The line is a 98, but wasn't labeled. The data set was corrected.

042862 Escondido/042871 Escondido Church, CA 1894-1947

Microfiche Problem

C10722A-C10737A

The data on the fiche for these two stations were mixed on both sets of fiche. Data had to be moved around in order to get the correct station ID for the data. The following table shows what the old data set contained, and what the new data set contains. Data sets C10723A-C10730A are for Escondido 042862. The data is out of sequential order but that should be fixed with the next sort. Data sets C10731A-C10737A are now Escondido Church Ranch 042871 and are in chronological order. The substation history files were used to determine each station, as well as continuity of observer. C10722A contains two years which could not be accounted for in the station history files. The fiche has written on it "do not use". **C10722A was deleted from the Master Fiche List.**

Jan. 1922 was keyed as Jan. 1923. The data set was corrected.

044056 Los Gatos 5SW/Holy City 3WNW, CA  
Keying Problem

C10959A-C10961A

After investigating Los Gatos 5SW and Holy City 3WNW, it was discovered that they were indeed the same station. However, the station ID changes in Dec. 1949. Therefore, the following changes were made:

- 1) Dec. 1949 data was moved from C10960A to C10959A
- 2) Copied the contents of C10961A to C10959A to replace the data for 1950 (more complete data was contained in C10961A for 1950 than what was in C10959A). **C10961A was removed from the Master Fiche List.**
- 3) The wrong station ID was keyed for 1943-1949. The station ID was changed from 045123 to 045126. It was also discovered that this data set is identical to C11232A. **C10960A was removed from the Master Fiche List.**

044097 Hopland Largo Station/044100 Hopland 8NE, CA 1939-1947

Keying Problem

C10962A-C10963A

After investigating the two stations, 1943-1944 in C10962A was moved to C10963A and the station ID was changed to 044100.

044156 Hullvilla 3.5NW, CA October 9, 1909-1934

Keying Problem

C11113A-C11117A

The Station ID was found to be 044156 instead of 044158 (compliments of Cliserve). The Station ID was corrected.

044176 Huntington Lake, CA April 1942

Keying Problem

C10969A

The station ID should be 044176 instead of 044170. The data set was corrected.

044211 Idyllwild, CA 1943-1947

Keying Problem

C10981A

The station ID should be 044211 for the whole data set instead of changing in some places to 044208. The data set was corrected.

044274 Inskip Inn, CA May 1948

Keying Problem

C10996A

99's were keyed for May 1948. May 1948 was removed due to incomplete data.

044278 Inyokern/044280 Inyokern Armitage, CA 1940-1949

Keying Problem

C10997A-C10998A

After investigating, it was determined that Feb. 1944-Dec. 1949 was indeed Inyokern Armitage. The station ID was changed to 044280.

?????? Iron Mountain, CA Dec. 1896

Station ID Problem

C11009A

After investigating, it was determined that Dec. 1896 was for Iron Mountain in Shasta County. The CD gave us no insight into

the problem. **C11009A was deleted from the Master Fiche List.**

044412 Julian, CA

044415 *Julian Manzanita Ranch, CA 1929-1949*

Microfiche Problem

C11018A-C11022A

The microfiche for these data sets are labeled Julian. However, after close inspection, it was discovered that 1929-1949 on these data sets was actually Julian Manzanita Church 044415 instead of Julian 044412. 1929 was moved to C11019A. Then, the station ID for C11019A-C11022A was changed to 044415.

044415 Julian Manzanita Ranch, CA 1949

Keying Problem

C11022A

January 1945-December 1948 shouldn't have been keyed. Jan. 1945-Dec. 1948 was removed from C11022A. Also, the WBAN was changed from 044412 to 044415.

044555 King City, CA 1900

Keying Problem

C11064A

There was a blank line keyed causing a break in the database. The line was removed.

044591 Knights Landing, CA May 1912

Keying Problem

C11076A

The station ID was accidentally keyed in as 000445 when it should have been 044591. The station ID was corrected.

044592 Knights Landing Southern Pacific, CA 1906-1918

Keying Problem

C11070A-C11074A

The station ID for C11070A-C11072A was changed from 044591 to 044592. Also, **C11073A and C11074A were deleted from the Master Fiche List** because it was a duplicate of C11080A and C11081A.

044628 La Crescenta FC 251B, CA Feb. 1923

Keying Problem

C11085A

Feb. 1923 was keyed as Feb. 1927. The data set was corrected.

044679 Lake Eleanor, CA 1930-1935

Keying Problem

C11108A-C11109A

The station ID in some places was keyed as 044671 or 044664 when it should have been 044679. The data set was corrected.

044735 La Mesa, CA 1947

Microfiche Problem

C11141A

July of 1947 was placed out of chronological order on the fiche, causing it to be keyed out of order. The data was corrected.

044852 Laytonville #2, CA 1945-46

Keying Problem

C11162A

The station ID was keyed as 044851 when it should have been 044852. The data was corrected.

044890 Lemon Cove, CA Dec 1913

Keying Problem

C231

Frost was keyed as snowfall for the first 6 days of the month. The data was corrected.

045001 Llano, 045002 Llano Shawnee Hills Ranch, CA 1945

Microfiche Problem

C11186A-87A

In C11187A, there is data for Llano 045001 on the fiche for Llano Shawnee Hills Ranch 045002. January through April 1945 were moved from C11187A to C11186A and the station ID was corrected.

045023 Lockwood Mesa, CA Feb.-June 1948 (w52604)

Duplicate Data Problem

C11190A

C11190A in w52604 is a duplicate of C11190A in w52495. **C11190A in w52604 was removed from the Master Fiche List.**

045082 Long Beach, CA 1906-1914

Keying Problem

C11194A-95A

96's were keyed in for several months in this time period. The 96's were removed from these months to allow for the data to be accessed. The reason for the 96's is no precipitation keyed in for these months. Some of the total precip. amounts for the months were either not keyed in, or were an accumulation of rainfall from the rainy season. The precipitation amounts were corrected when possible.

045082 Long Beach, CA 1907-18

Observer Problem

C11194A-96A

The temperature data is not Max/Min, but belongs in the temp at given time column. The data was moved to the correct column. The observer often would not note that the temps were taken at a specific time. Also 9999 was keyed in for rainfall in Jan-Feb 1907 when they should have been 99999. That was also corrected.

045115 Los Angeles, CA July 1912, Sept. 1912

Keying Problem

C11209A

96's were keyed in for July 1912 and Sept. 1912. The 96's were removed from these two months to allow for the data to be accessed. The reason for the 96's is no precipitation keyed in for these months.

045118 Los Banos, CA 1911-1917

Observer Problem

C11211A-C11212A

7am, 2pm and 9pm temperatures were keyed in the wrong column. The observer failed to note the time of observation on some months. The data was corrected.

045118 Los Banos, CA July 1917, Nov. 1917

Keying Problem

C11212A

96's were keyed in for July 1917 and Nov. 1917. The 96's were removed from these two months to allow for the data to be accessed. The reason for the 96's is no precipitation keyed in for these months.

045123 Los Gatos, CA 1934

Keying Problem

C11228A

June 1934 was keyed as station ID 045118 when it should have been 045123. The data was corrected.

045126 Los Gatos 5SW, CA Jan.-June 1948

Keying Problem

C11232A

The WBAN for C11232A was changed from 045123 to 045126.

045131 Los Molinos, CA 1913-1917

Observer Problem

C11233A

7am, 2pm and 9pm temperatures were keyed in the wrong column. The observer failed to not the time of observation on some months. The data was corrected.

045147 Los Prietos Ranger Station, CA 1943

Keying Problem

C11236A

A blank line was keyed at the beginning of the data set, causing a break in the database. The line was removed.

045162 Lower Otay Reservoir, CA 1944

Keying Problem

C11237A

Due to a file in the data set already being named C11237A, the file named C11237A (w52492) was renamed C11237B.

045215 Lytle Creek Powerhouse, CA 1906-June 1909

Observer Problem

C11240A

Observations for this time period were taken at 6:30 a.m. and 12:30 p.m. The temperature data had been keyed in the wrong columns. The data was corrected.

045218 Lytle Creek Ranger Station, CA 1921-24

Keying Problem

C11248A

The station ID was keyed as 041268 when it should have been 045218. The data was corrected.

045231 Madeline, CA Feb. 1935

Observer Problem

C11260A

The temperature data for Feb. 1935 was found to be unreliable.

The data was corrected.

045231 Madeline, CA June-July 1935

Keying Problem

C11260A

The data for June-July 1935 were removed due to questionable data. Since there were no other data keyed for Madeline, CA, **C11260A in W52495 was removed from the Master Fiche List.**

045231 Madeline, CA 1943

Keying Problem

C11260A

A blank line was keyed in the data set, causing a break in the database. The line was removed.

The temperature data was keyed in the wrong column. The data was corrected.

045377 Martinez Fire Station, CA 1910-1918

Keying Problem

C11290A-91A

96's were keyed in for several months in this time period. The 96's were removed from these months to allow for the data to be accessed. The reason for the 96's is no precipitation keyed in for these months. Some of the total precip. amounts for the months were either not keyed in. The precipitation amounts were corrected when possible.

045385 Marysville, CA 1904-1910

Observer Problem

C249-51

The temperature data was keyed in the wrong column for July-Aug. 1908. The data was corrected. Also, seasonal rainfall totals were keyed in the snowfall column for multiple months in the data sets. This data was corrected, as well.

045385 Marysville, CA 1935-1939

Keying Problem

C257

The station ID was keyed as 045391 and was named Marysville D Street Bridge. The station ID was changed to 045385 and the station name was Marysville to reflect accurate data from the fiche. **Changes to the Master Fiche List were made to reflect this.**

045385 Marysville D Street Bridge, CA Oct. 1942-Jan. 1943

Keying Problem

C258

Due to duplicated data on the fiche for Marysville D Street Bridge and Marysville, October 1942-January 1943 was deleted from C258.

045391 Marysville D Street Bridge, CA 1893

Keying Problem

C11297A

A blank line was keyed in the data set, causing a break in the database. The line was removed.

045391 Marysville D Street Bridge, CA 1920-1924, 1940-1944

Keying Problem

C11301A, C11305A

After comparing the microfiche for Marysville and Marysville D Street Bridge, CA, looking at the CD and comparing the observations, it was determined that C11301A and C11305A should have been keyed with the station ID #045391 instead of #045385. The data sets were corrected to reflect the correct data. **Changes to the Master Fiche List were made to reflect this.**

045502 Mecca Fire Station, CA 1904-Nov. 1905

Observer Problem

047711 Mouth of San Antonio Canyon, CA

048213 San Antonio Canyon Mouth, CA 1916-1947

Station ID Problem

C11729A-C11738A Data Sets

Between 1916-1947, there are two separate stations with two separate sets of data that share the same station ID. One station has Ontario #1 written on the fiche data, and the other has Sierra Power House. The elevation and observer names of the Ontario data set (C11733A-38A) correspond with the substation history records of Mouth of San Antonio (ID#047711. The elevation, name and lat/long of the Sierra station correspond with a station called Sierra Power House. Station history for Sierra Power House 048213 begins in 1956, but the information on C11729A-32A cannot be any other station. C11729A-32A was changed from station ID 047711 to 048213. Below are some specific details of each set of Fiche if further review is needed.

Mouth of San Antonio=Ontario #1 Hydro. JJ Bryan→observer Jan. 1933-1947

Oscar Gaither→observer corresponds with station inspection stating elevation of 2500 ft.

It is believed that this is the correct station for this ID.

San Antonio Canyon Mouth=Sierra Hydro. Plant

054082 Holyoke, Holyoke (Near), Amherst, CO 1893-1900

Station ID Problem

C12645A, C12646A, C12657A Data Set

There are three separate stations with separate data all listed as Holyoke 054082. Some of this data overlaps and is not the same. The overlapping years are 1895-1899 (Data sets C12645A and C12646A). One fiche is labeled Holyoke, the other is labeled Holyoke (Near). Data set C12657A (labeled Amherst) was keyed out of sequence but does not conflict with the other data. On the two overlapping data sets, the data sets were mixed up within two sets of fiche, Holyoke and Holyoke (Near). After reviewing the CD for Colorado and the microfiche, it was determined which data went to which data set file. The corrected version of C12645A contains the correct record as verified by the CD for Holyoke. C12657A (Amherst, CO) is also represented in the CD and was changed to C12645A to maintain chronological order. C12645A was changed to C12657A and contains data which the CD does not contain. **C12657A has been deleted from the Master Fiche List;** its contents cannot be determined.

C609-C611 Data Set

1892-July 1895: Station is listed as Homeland.

Aug. 1895: The name is changed to Bartow, but the observer stays the same. The period of record continues uninterrupted through 1930.

April 1898-1900: (C609-C610 A new station is created at Homeland with a different observer and a different set of observation data. This file is listed in the fiche with the same Station I.D as Bartow for the same period. After inspecting the substation records, there is no evidence of the second station being created in Homeland in 1898. There is evidence of a second station however, which was never assigned a station ID. The folder lists it as Bartow fruit-frost station and the only records in the folder are from 1928. Coincidentally, there is a note in this file about the station not having a rain gauge, and the observations in Homeland from April 1898-1900 also does not have a rain gauge. Since there was no station ID attributed to this station, **the data has been deleted from the Master Fiche List (C610)** until such a time that a [station ID may be assigned](#). The data for this new station was moved from C609 to C610, so now all of the data for this station is on one data set (C610, and this was the file deleted. Station I.D. Problem

C13567A-C13572A

All the fiche for this data set were labeled Panama City #2. Yet the observer never writes #2 anywhere in the data set, and this is an uninterrupted data set that is coming from one station, verified by looking at latitude and longitude as well as by looking at the observer names. Also of note is that as late as 1939 there was the station I.D. for Panama City 086836 and then on the 1945-49 fiche was found the Panama City #2 station I.D. 086841. It was determined through looking at the substation records that all they keyed data belongs to station ID 086386. The data was changed to reflect this.

Microfiche Problem

C13652A-C13655A

Newport and St. Marks 5SSE have the same station I.D. One fiche for 2 months in 1911 is labeled St. Marks 5SSE (C13652A). Then the next two fiche jump to 1942-47, also labeled St. Marks 5SSE (C13652A-53A). The following fiche are labeled Newport and run from 1907-1916 (C13654A-55A), with a gap in 1911 that is covered by C13652A. In order to put the fiche in order while maintaining the changes in station names the following changes have occurred:

	Old Data Contents	New Data Contents
C13652A	1911 St. Marks	1907-11 Newport

Microfiche Problem

C13625A-C13629A

Microfiche for 1930-1947 (C13625A-29A) was labeled at the top of the fiche as Sarasota 088021 but is actually Sarasota 5E 088024. This was proven by looking at the individual months, which were

labeled with 088024. In 1947, (C13628A) the fiche contains Sarasota 5E 088024 until September, at which time the months switch to Sarasota 088021 on the fiche. The next fiche (C13629A) has September 1947-1949 Sarasota 5E 088024. The data sets for 1930-1948 were changed from 088021 to 088024. September 1947-December 1947 for Sarasota 088021 were moved from C13628A to C13629A. Those same months for Sarasota 5E were switched from C13629A to C13628A.

101084 Bonners Ferry Bridge/101079 Bonners Ferry 1 SW 1904-1971

Microfiche/Station I.D. Problem

C14455A-C14471A

Bonners Ferry Bridge 101084 is a river station that starts in 1904. It shares a similar name and location with Bonners Ferry 1 SW 101079 which is a full temperature and precip station which began on the fiche in January 1951. The Station ID for Bonners Ferry Bridge was keyed in as 101084 for 1904-1911, 1915-1934, and 1940-1949, which are all correct. The ID was keyed in as 101079 for 1911-1914 and 1935-1939, which was changed to 101084. After 1950, the fiche contains records for both stations on the same fiche. The temperature data for Bonners Ferry 1 SW and the proper ID were keyed in beginning 1951. The river data during this period contains only river stages and no precip or other climatological values, so there is no need to go back and key anything. In summary, the corrected data sets will read 1904-1950 as Bonners Ferry Bridge 101084 and 1951-1971 as Bonners Ferry 1 SW 101079.

C15744A

Snowfall and Rainfall were keyed in reverse. The data was corrected.

116711 Peoria, IL 1893-1986

Microfiche Problem

C15696A-C15707A

It was noticed that Station #116711 and #116701 looked to be out of order. However, after further inspection of the microfiche for these stations, it was proven that the information for the stations and the data set were correct. Therefore, no changes were made.

116711 Peoria, IL 1918-1923

Observer Problem

C15724A

Snowfall and snowdepth data were written in the same column for several months in this time period. The snowdepth data was moved to its proper column.

116751 Peru, IL Mar. 1917-1944, 1950

Station ID Problem

C15724A-C15729A, C15731A

The Station ID was keyed in as 116753 (Peru 2W) from March 1917 through August 1950. This does not match with the station history of 116753. Cliserve doesn't have 116751 starting until July 1948, but the station has a continuous recording beginning in 1917. After July 1948, the station does verify as 116751. For continuity all the data was changed to 116751.

117004 Princeville, IL July 1928

Keying Problem

C15752A

96's were keyed in for the date in July 1928. The 96's were replaced by the appropriate date due to the data being reliable.

117077 Quincy Dam 21, IL 1937-1944

Keying Problem

C15757A

The station ID was keyed in as 117067 and should have been 117077. The problem was corrected.

117551 Rushville, IL 1893-94

Microfiche Problem

C5688A

The form used for observations during this time period had melted snowfall and precip as two separate entries. Melted snowfall either was not keyed or was keyed as snowfall. The data was added to the precip data to correct it.

117876 Shelbyville Dam, Feb 1982

Observer Problem

C15832A

The snowdepth was written and keyed in the snowfall field. The data was corrected.

117876 Shelbyville, IL 1941-1984

Chronological Problem

C15828A-C15833A

The fiche were keyed out of order causing breaks in the database.

The names were changed to place them in sequential order:

128725 Terre Haute (Airport)/ 128732 Terre Haute Water Co., IN 1950-1974

Microfiche Problem

C16509A-C16513A

There are two separate stations on these fiche. From 1950 through August 1954, the station is Terre Haute (Airport) 128725. This station closes and in September 1954 Terre Haute Water Co. 128732 begins, and continues through the rest of the data. September 1954 through December 1954 was moved from C16509A to C165910A. 129080 Vevay, IN

125381 Markland Dam, IN 1884-1921

Keying Problem

C5897-C5904

This station was known as Vevay until 1921 when the equipment was moved to Markland Dam where a river gauge was already present. Station History files for Vevay are placed in the Station History folder for Markland Dam, but the station is over 6 miles away from Markland and more closely resembles a station for Vevay that opens in 1960. The station history files for Vevay mention a continuation of an old station. Therefore, the station ID has been changed from 125381 (Markland Dam) to 129080 (Vevay).

129080 Vevay, IN Jan 1895

131005 Buckingham, IA 1899-1913

Station ID Problem

C16744A-C16746

Data sets C16744A-C16746 have station ID #130999 stamped on them. However, CliServe indicates that the data set belongs to station ID #131005.

131060 Burlington, IA

131063 Burlington, IA 1897-1979

Station ID Problem

C16747A-C16760A

Data sets C16747A-C16755A were keyed in as 131064 and should have been keyed in as 131063. The correct number was stamped on the fiche, and was verified through the Midwest Regional Climate Center. This was corrected. C16756A-C16760A was keyed as 131064 and should have been keyed as 131060. This was verified using CliServe. It was corrected also.

131060 Burlington Radio KBUR, IA 1966-79

Burlington (River), IA 1977-79

Keying Problem

C16756A-60A, C16756B-E

It was discovered that Burlington Radio KBUR had two sets of data recorded on two different sheets during 1966-79. It was determined from Station History files and from investigating the files that the only difference between the two sets of data was that Total Wind Movement and Evaporation data were included on one set. Temperatures, Precipitation, etc. were the same for both sets of data. To prevent any possible duplicate months, it was decided that where there were months with two sets of data, the data with the Evaporation data took precedence. As a result, the following changes were made:

C16756a.new-C16760a.new were created;

Consolidating data

- C16756a.new: 4/1966-10/1966 was moved from C16756b in w52492 to C16756a.new in w50929;
- C16757a.new: 7/1972-10/1972, 4/1973-9/1973 and 4/1974-6/1974 were moved from C16756c in w52492 to C16757a.new in w50929;
- C16758a.new: 7/1974 was removed from C16758a.new;
- C16759a.new: 5/1975-10/1975, 4/1976-10/1976 and 4/1977-10/1977 were moved from C16756e in w52492 to C16759a.new in w50929;

Removing 99's due to lack of data

- C16757a.new: 99's were removed from 12/1971-3/1972;
- C16759a.new: 99's were removed from 1/1976, 1/1977, 3/1977, 1/1978, 11/1978-1/1979;
- C16760a.new: 99's were removed from 3/1979;

**File Deletions:**

- C16756b-C16760b and C16756b.new-C16760b.new (w50929) was removed from the folder due to lack of need to separate months of Evaporation data from months without Evaporation data;
- C16756b.new (w52492) was removed from the folder due to the lack of need for it;

Fiche List Changes

- C16756b-C16760b (w50929) was removed from Master Fiche List due to re-investigation of data determining that Evaporation data didn't need to be separate from the regular climate data;
- C16756b-e (w52492) was removed from Master Fiche List due to consolidation of reliable data from these files to C16756a.new-C16760a.new;

131099 Bussey, IA 1899-1994

Chronological Problem

C16762A-C16764A

One fiche for Bussey, IA is from 1899 through 1902. While there is no record in the station history for this time period, the data on the fiche does label it as Bussey, IA. It has precipitation data only. The names of the files were changed to place them in chronological order.

C16762A was changed to C16763A.

C16763A was changed to C16764A.

C16764A was changed to C16762A.

131319 Cedar Rapids #1, 1892-1894

Microfiche Problem

C16786A-C16787A

131394 Chariton, IA Nov 1895-Jan 1896

Observer Problem

C16811A

It was found that the max/min temps for these months were just the high and low temps of the 7am/2pm/9pm temps, and thus were not true Max/Min's for that day. The max and min temps were removed for these months but the 7am/2pm/9pm temps remain.

131398 Chariton 5 SE 1966-1974

Keying Problem

C16822A

This data had the incorrect station ID keyed. The data on the fiche stated the ID should have been 131398 and not 131394 which was keyed. The data was corrected.

131398 Chariton 5SE, IA 1973-77

Observer Problem

C16822A-23A

Precipitation values were incorrect during this time period. There were two or three rows of precip. values that were written in the snowfall and/or snowdepth column. These values corresponded to individual precipitation events for each day. Therefore, the values that were written in the snowfall and/or snowdepth column were added in to the rainfall column. The data was corrected.

131640 Clinton, IA 1904-1939

Station ID Problem

C16836A-C16840A, C16842A

Two station ID's were keyed for this data. The correct station ID should be 131640 instead of 131635. The data sets were corrected.

131640 Clinton #2, IA Mar 1923

Observer Problem

C16839A

Observer was unable to make precip obs for several days, but zero was keyed in for precip. The zeros were replaced with 99999 for

that time period.

131640 Clinton #2, IA Dec 1930

Observer Problem

C16841A

Snowdepth was written and keyed in snowfall field. Correct snowfall data was written off to the side. The data was corrected.

131641 Clinton, IA 1908-1909

Microfiche Problem

C16836A

The data on the microfiche was placed out of order causing the data to be keyed out of order. The data was corrected.

135664 Monticello, IA 1893-1906

Microfiche Problem

C17293A-C17295A

The fiche sets indicate that the station ID for Monticello was 135664. However, Cliserve lists the station ID as 135669. Cliserve has a record of the station ID 135664, yet this is no way to confirm at this point that this is the correct station. After looking at the substation records for 135669 and 135672, it is confirmed that this station could not be either of these. Therefore, these data sets were changed to reflect the correct station ID, 135664.

C17397A

The station ID was keyed as 136509 when it should have been 136520. The data was corrected.

136766 Postville, IA 1893-1990

Station ID Problem

C17429A-C17441A

The station ID for this station in Cliserve is 136766, and that is what has been keyed. The perplexing thing is that on the fiche themselves the station ID is 136755, which is the station ID for Popejoy, IA about 100 miles away. Popejoy is a more recent station starting in 1949, and on the fiche for Popejoy it also says that the station ID is 136755. It may just be a mistake by the person stamping the fiche. No changes were made.

136766 Pottsville, IA June 1941

Keying Problem

C17437A

June 1941 was keyed in as June 1911. It was verified by microfiche and the data set was corrected to reflect the new year.

136766 Pottsville, IA 1935-44

Chronological Problem

C17437A-C17438A

The data sets were rearranged to follow in chronological order. C17437A is now C17438A and vice versa.

Temperature data was found to be unreliable. The data was removed.

137859 Spirit Lake, IA 1954

Keying Problem

C17562A

May 1964 should have been keyed in as May 1954. The data was corrected to reflect this.

137932 Steamboat Rock, IA 1958-76

Observer Problem

C17566A-70A

Snowfall data is written in hundredths when it appears it should be written in tenths, i.e. when it says .20 it should probably be 2.0. Unfortunately the decimal point on the fiche is written clearly, so no changes could be made. It is still believed that

most of the snowfall data in this time period is possibly incorrect.

138255 Tingley, IA 1931

Microfiche Problem

C17593A

April 1931 was labeled as April 1930 and should have been keyed in as April 1931. The data was corrected to reflect this.

138296 Toledo, IA Dec 1944

Keying Problem

C17603A

96 was keyed in for this month. The data was found to be reliable, so the 96's were removed so the data could be accessed. The precip and snowfall data for this month were unreliable so the columns were filled with 9999.

138307 Tracy 1 NE, IA Dec 1946

In-House Keying Problem (done here)

C17603A

9999 was keyed in for missing precip when it should have been keyed as 99999. The problem was keyed in-house. The data was corrected.

138360 Turin, IA 1991-94

Observer Problem

C17608A

Several days during this time period had the max temps in the min column and vice versa. The data was corrected. Also the temp data seems unreliable because it is sporadic and often the max temp is lower than the min temp of previous day, but no written proof on fiche claims that it is unreliable. No other changes were made.

138490 Van Meter, IA Sept and Oct 1929

Keying Problem

C17610A

150122 Alpha, KY Dec 1893-Jan 1895, Dec 1906

Observer Problem

C19162A, C19164A

Max and Min Temps. for the period of Dec 1893-Jan 1895 were actually the 7am/2pm/9pm temperatures taken at the station. Therefore, the Max. and Min. Temps. were removed. Also Dec 1906 temps were considered unreliable and were removed.

150122 Alpha, KY July 1920-July 1921

Keying Problem

C19167A

96 lines were keyed for June and July of 1921. June and July 1921 were removed from the data set due to the unreliability of the data. Also, July 1920-May 1921 contained unreliable temperature data (re: note on fiche for these months). Therefore, the temperature data for July 1920-May 1921 was replaced with 9999's.

150155 Anchorage, KY 1896

295273 Luna Ranger Station, NM Sept 1911-Mar 1912  
Microfiche Problem  
C7706A  
Several of the months on this microfiche were mislabeled because the tops of the observation forms were cut off. The months labeled June-Sept 1911 were actually the months of Sept-Dec 1911. The months were corrected. Also, the months labeled Oct-Dec 1911 were actually Jan-Feb and April 1912. These months were duplicated on the fiche, so the duplicates were removed. The month labeled March 1912 was actually May 1912 and it was also a duplicate and was deleted. There were no observations for June-Aug 1911 and March 1912.

305728 New Hackensack Airport, NY 1939-41

**Station ID Problem**

C30667A-68A

Station History files were received for Poughkeepsie Airport, NY with the Station ID's 306817, 306820, 306823, 306825 and 306827. The only Station History folder that had any relevant information was 306820. No information was listed on a Station History file in the folder for 306820. However, this folder contained a sheet that had New Hackensack Airport, NY, the time period with which the information was available for and the station ID 305728 for New Hackensack Airport. The sheet was not an official document, but it was a sheet that a past contractor had used to verify scanning information for the station. Since New Hackensack Airport doesn't match up with any of the station files for Poughkeepsie Airport, NY and given the sheet contains information about the station at New Hackensack Airport, no changes have been made to the data set at this time. It is recommended that any official documents with the station ID 305728 be obtained to verify the validity of the station ID in relation to this data.

**Station ID Problem**  
 C3176-77  
 Station History files show that Stillwater Reservoir started in 1921 and was located in Herkimer County near the town of Number Four, NY. C3176 is titled Stillwater on the fiche, but is located in Saratoga County, about 25 miles north of Albany and well over a 100 miles from Number Four, NY. C3177 is also titled Stillwater, but it is located near Altmar, NY in Oswego County about 60 miles from Number Four, NY. Because of the discrepancy in location, **C3176-77 were removed from the Master Fiche List.** No information could be found for the Station ID's for C3176-77.

314260/314265 Hot Springs, NC 1927-30

Station ID Problem

C31222A

Station History files were used to determine the correct Station ID for Hot Springs, NC. Unfortunately it could not be completely confirmed that this station ID is correct. There are two distinct stations in Hot Springs during this time period. Station ID 314265 is already accounted for in C31214A-21A. The station history files for Station ID 314260 state that it was a precip and river station that began in 1941. While the data on C31222A is earlier than this, it is also a precip only station, and with no other station ID numbers that it could be, it was decided that 314260 would be the best possible solution. Therefore the station ID was changed from 314265 to 314260. Also May 1929 was actually for station 314265 on C31217A and vice versa. The months were switched

315763 Moncrue, NC 1894-1932

Microfiche Problem

C31292A-C31305A

Two separate forms were filled out and put on the microfiche for this station. C31292A-98A contained temperature data and precip data from 1910-32. C31299A-305A contained precip data and was a river station. It was confirmed that these were the exact same location. C31292A-93A was missing precip data, so the precip data was copied from C31299A-00A. June 1903 was missing from

C31292A, so it was copied from C31300A. The year 1899 was removed from C31299A, so it now contains 1894-98. 1899 starts up in C31292A and the rest of the data is correct. Because of duplicate data, **C31300A-05A have been deleted from the Master Fiche List.**

## 40 - TENNESSEE

400884 Arlington TN, 1902-20

Station ID Problem

C38102A-06A

Station History files show that a Station Number wasn't assigned to Arlington, TN for 1902-20. It is recommended that the data be assigned the Station Number for Bolton (due to its close proximity) even though the data are for Arlington, TN, or a new one be assigned to it to distinguish it from Bolton.

402806 Elizabethton, TN 1935-1945

**Station ID Problem**

C38250A-52A

There are two sets of data for the same station for 1933-Aug. 40. It was determined that one set of data is from an observer with the last name of Manning that runs from 1926-1940 (a river station with precip. data only).

There is also another set of data from an observer with the last name of Hyder from June 1933-1943 and with the last name of

Clark for 1943-45 (both observers recorded rainfall and temp. data that belonged to the same station).

**C38250A-52A were removed from the Master Fiche List** (data observed by Hyder and Clark) due to the observers and data not correlating with Station History files. However, it is recommended that a Station ID be assigned to C38250A-52A to distinguish the difference in the data.

404657 Johnson City, TN 1893-1945  
**Station ID Problem**  
C38345A-52A  
Station history files were unable to clearly resolve the correct

station ID for this set of data. The data was entered into CIMS and keyed as 404664. The substation history states that 404664 was a rainfall only station from 9/1/38 to 4/1/46. The station history files contained paperwork that seemed totally different than the substation history. The paperwork had the station ID 404657, which CIMS and SHIPS say is for Johnson City from 1948-51 and corresponds with data on the 1945-49 fiche. A station history file for 404657 could not be located. The data on the fiche are temperature and precip and run from 1893-94, 1910-31, and 1944-49. Because the last years correspond with 404657 and there is no similarity to 404664, the station ID for this data was changed from 404664 to 404657. Further research may be needed to determine the correct station ID for this data.

Keying Problem  
C45399A  
Temps. were keyed incorrectly for a number of days in Dec. 1911. The data were removed.

503226 Gambell, AK 1901-04

Observer Problem

C45408A

Temps. written in the Max. Temp. column are questionable due to the observer crossing out the word "Maximum" and writing "Standard" over it. Also, 1901-02 contains two sets of temperatures in the Max/Min Temp. column, which is difficult to discern the accurate temperature for each column. It is undeterminable as to how reliable the Temps. are for 1901-04, so Temps. were removed from C45408A.

Plus, the observer wrote out the word snow when it had snowed without placing a numerical value. Not to be blamed in any way for the problem, the keyer assumed that it was a trace of snow. However, it is believed that snowfall amounts were greater than a trace for a number of days in 1901-04. The data were replaced with 9999 or 99999 for snowfall and rainfall equivalent, respectively.

504555 Kennecott, AK Nov. 1909, Feb. 1910

Keying Problem

C45501A

Temps. were miskeyed for Nov. 1909-Feb. 1910 due to confusion over the observer writing below or above beside each temperature instead of a minus sign for below zero Temps. The data were corrected.

504984 Kodiak, AK Feb. 1920, Feb. 1921

Keying Problem

C45536A

There were two sets of data in C45536A that were labeled Feb. 1920. The first set of data appears to be Feb. 1921 due to it being verified and stamped on Mar. 30, 1921. However, the snowdepth data for Feb. 1921 was keyed in the actual Feb. 1920 data which is on the image that follows. Snowdepth data for Feb. 1920 was corrected.

504984 Kodiak, AK 1920-21

Keying Problem

C45536A

Due to a file in the data set already being named C45536A, C45536A in w52492 was renamed C45536B. Due to duplicate data being discovered for 1920-21, **C45536B was removed from the Master Fiche List.**
